Abdul Rehman is a dynamic entrepreneur and aspiring software engineer. Currently pursuing a Bachelor of Science in Software Engineering at the University of Lahore, he balances his academic pursuits with entrepreneurial responsibilities. With expertise in multitasking, adaptability, and innovation, Abdul is committed to personal and professional growth. He is eager to explore opportunities that combine his passion for technology and business, aiming to make a lasting impact in both fields.

Work Experience

Founder & CEO

SYNTHEX Software House-Lahore

March 2025 to Present

- Founded and lead a software house focused on delivering innovative web and mobile applications for clients across multiple industries.
- Managed the development process from concept to deployment, overseeing requirements gathering, system architecture design, and project execution.
- Led a talented team of developers to create custom software solutions, improving clients' operational efficiency and user engagement.
- Implemented Agile methodologies to ensure timely delivery and adaptability to client feedback.
- Delivered solutions using technologies such as Python, Django, JavaScript, React, and Node.js for both front-end and back-end development.

Software QA Tester / Intern

Solutek-Lahore

June 2024 to August 2024

- Performed manual testing of web and mobile applications to identify bugs and ensure quality.
- Created and executed test cases based on software requirements.
- Documented and reported bugs using tools like JIRA.
- Collaborated with developers to verify fixes and improve product stability.
- Gained exposure to API testing using Postman and learned the basics of Selenium for automation.
- Participated in daily standups and sprint reviews following Agile methodology.

Associate Software Engineer / Intern

Punjab Assembly - Lahore, Pakistan

1st July 2025 to 30th August 2025

- Assisted in the development and maintenance of internal software systems used by the Assembly.
- Collaborated with senior engineers to implement new features and improve existing modules.
- Worked with databases to retrieve, update, and manage data for various departmental applications.
- Performed debugging and troubleshooting to resolve software issues and enhance system performance.
- Gained hands-on experience in version control using Git and participated in code reviews.
- Contributed to documentation of technical processes and system workflows.
- Participated in team meetings and supported development tasks following Agile/Scrum practices
